Association for Computing Machinery(ACM)

1947년 설립된 Association for Computing Machinery는 컴퓨터 및 IT 관련 모든 분야에 대한 최신정보를 제공하는 협회로써, 현재 전세계 100,000여 명 이상의 회원을 보유하고 있습니다.

ACM 회원들은 단순히 기술보고서나 논문을 게재하는 활동 외에도 연구 시 발생되었던 문제들과 해결방법, 그리고 수록된 기술보고서나 논문에 대한 Review를 제시 함으로써 컴퓨터 관련 분야의 가장 권위 있는 Community를 형성하고 있습니다.

ACM URL : <http://www.acm.org>

Association for Computing Machinery(ACM)

1. 주제분야 : 컴퓨터 공학분야
2. 수록내용 :

- The ACM Digital Library

컴퓨터 공학 분야의 Journal, Magazine, Transaction, Conference Proceeding, Publications by Affiliated Organizations, Book, Technical Reports 및 Newsletters의 원문(PDF형식) 및 논문의 서지 정보 제공

- 1950년부터 현재까지
- 2,000,000여 건의 서지 Records, Full-text Articles
- 매년 2만 5천 여건의 Records update
- Audio, Video를 포함하는 6,000개 이상의 multimedia 파일

ACM Journals/Transactions

Search within the ACM Journals:

CSUR [ACM Computing Surveys \(CSUR\)](#)

These comprehensive, readable tutorials and survey papers give guided tours through the literature and explain topics to those who seek to learn the basics of areas outside their specialties. The carefully planned and presented introductions in [Computing Surveys \(CSUR\)](#) are also an excellent way for professionals to develop perspectives on, and identify trends in complex technologies. Recent issues have covered image understanding, software reusability, and object and relational database topics.

JACM [Journal of the ACM \(JACM\)](#)

The [Journal of the ACM \(JACM\)](#) provides coverage of the most significant work on principles of computer science, broadly construed. The scope of research covered encompasses contributions of lasting value to any area of computer science. To be accepted, a paper must be judged to be truly outstanding in its field. JACM is interested in work in core computer science and in work at the boundaries, both the boundaries of subdisciplines of computer science and the boundaries between computer science and other fields.

JDIQ [Journal of Data and Information Quality \(JDIQ\)](#)

[JDIQ's](#) mission is to publish high quality articles that make a significant and novel contribution to the field of data and information quality. JDIQ welcomes research contributions on the following areas, but not limited to: Information Quality in the Enterprise Context; Database related technical solutions for Information Quality; Information Quality in the context of Computer Science and Information Technology; Information Curation.

JDIQ accepts research conducted using a wide variety of methods ranging from positivists to interpretive methods, systems building descriptions, and database theory, as well as statistical analysis, mathematical modeling, quasi experimental methods, hermeneutics, action research, and case study. JDIQ accepts diverse research methods that are customary in different research backgrounds and traditions, both quantitative and qualitative. Research papers need to demonstrate the use of a rigorous method or methods. Research papers also need to provide valuable and relevant implications for applying their findings and solutions in practice.

JEA [Journal of Experimental Algorithmics \(JEA\)](#)

The ACM [Journal of Experimental Algorithmics \(JEA\)](#) is the first publication devoted entirely to experimental work in algorithms and data structures. [JEA](#) is also the first on-line-only journal published by ACM, and it is available through a variety of protocols including http, ftp and fmail.

Evolutionary Computation

Evolutionary Computation provides an international forum for facilitating and enhancing the exchange of information among researchers involved in both the theoretical and practical aspects of computational systems of an evolutionary nature. The journal publishes both theoretical and practical developments of computational systems drawing their inspiration from nature, with particular emphasis on evolutionary algorithms (EAs), including, but not limited to, genetic algorithms (GAs), evolution strategies (ESs), evolutionary programming (EP), genetic programming (GP), classifier systems (CSs), and other natural computation techniques.

Journal of Usability Studies

Journal of Usability Studies (JUS) is a peer-reviewed, international, online publication dedicated to promoting and enhancing the practice, research, and education of user experience design and evaluation.

The journal aims to provide usability practitioners and researchers with a forum to share:

- Empirical findings and case studies
- Emerging methods and tools from within the user experience profession and from related disciplines, such as market research and technical communications
- Reports of good practices in user experience
- Approaches and case studies in usability education and training
