ICPSR?

다양한 주제 분야

세계 각국에서 다양한 분야별로 수집한 19,000여 건의 조사자료와 332,887여 개의 수치파일을 제공합니다.

## 접속 방법.

**!** ICPSR은 학교 인증과 개인회원 로그인의 **두 가지 절차**가 필요합니다.

### STEP 1. 학교 인증

도서관 홈페이지  
접속 후 로그인

학술 DB 리스트에서  
ICPSR 클릭

학교 인증  
완료!

※ 학교 인증이 완료된 이후에는 도서관 홈페이지를 통하지 않고 ICPSR에 직접 접속해서 이용 가능합니다. (학교 인증 유효기간 : 6개월)

## 접속 방법.

## STEP 2. 개인 회원 로그인

! ICPSR은 학교 인증 후 개인 회원 로그인을 해야만 모든 기능을 이용할 수 있습니다.

The screenshot shows the ICPSR website interface. At the top right, there are 'Log In' and 'Giving' buttons. The 'Log In' button is highlighted with a red box. Below the navigation bar, the main heading reads 'Data excellence. Research impact.' followed by a search bar and a list of research topics. At the bottom, there are several promotional banners, including one for the '2023 ICPSR Award' and another for the 'Data Communication Scholarship'.

우측 상단의 Log In 버튼을 통해  
로그인하거나 계정을 생성합니다.

# 접속 방법.

## STEP 2-1. 계정 생성

Log into ICPSR

Use MyData

You must set your browser to accept cookies in order for login to succeed. Your login session will last for nine hours (you log out).

Summary

Downloads of Add Health require submission of the following information, which is shared with the original producer of Add Health: supervisor name, supervisor email, and reason for download. A Data Guide for this study is available as a [web page](#) and for download.

The National Longitudinal Study of Adolescent to Adult Health (Add Health), 1994-2008 [Public Use] is a longitudinal study of a nationally representative sample of U.S. adolescents in grades 7 through 12 during the 1994-1995 school year. The Add Health cohort was followed into young adulthood with four in-home interviews, the most recent conducted in 2008 when the sample was aged 24-32. Add Health combines longitudinal survey data on respondents' social, economic, psychological, and physical well-

를 통해 주요 주제분야 혹은 관련기관의 자료를 제공합니다.

# THEMATIC DATA COLLECTIONS

## Data Collections at ICPSR

ICPSR partners with several federal statistical agencies and foundations to create collections organized around specific topics. These thematic collections bring a dynamism to ICPSR from which the broader social science research community benefits. The sponsors provide new data (in most cases free to everyone), which stimulate more research. The funded collections and ICPSR work together to build additional infrastructure for data discovery and use.

### Thematic Collections

Offering specialized collections of data in education, aging, criminal justice, substance abuse, terrorism, and other fields.

#### [Archive of Data on Disability to Enable Policy \(ADDEP\)](#)

This archive offers access to disability and rehabilitation data. ADDEP enables better understanding and implementation of the Americans with Disabilities Act and other disability policies with the goal of improving the lives and conditions of people with disabilities.

#### [Child and Family Data Archive](#)

The Child and Family Data Archive (CFData) is the place to discover, access, and analyze data on early care, education, and families. CFData hosts datasets about young children, their families and communities, and the programs that serve them.

#### [CivicLEADS - Civic Learning, Engagement & Action Data Sharing](#)

Researchers from a wide variety of disciplines study civic education, civic action, and the many relationships between the two. Civic

### Project Description

#### Summary

The Korean General Social Survey (KGSS) is the South Korean version of the General Social Survey (GSS), closely replicating the original GSS of the National Opinion Research Center at the University of Chicago. Each round of the KGSS typically includes the topical module surveys of the International Social Survey Programme (ISSP), and/or the East Asian Social Survey (EASS), an international survey network of four GSS-type surveys from countries in East Asia (including China, Japan, Taiwan, and South Korea). Respondents were asked for their opinions on Korean society, politics and reunification, economic issues, and social issues such as suicide. Additional questions were asked about the everyday life, household, and mental health of the respondents. Demographic information includes age, sex, marital status, income, employment status, religious preference, political party affiliation, and

## Terms of Use

Please read the terms of use below. If you agree to them, click on the "I Agree" button to proceed. If you do not agree, you can click on the "I Do Not Agree" button to return to the home page.

ICPSR adheres to the principles of the CoreTrustSeal Core Trustworthy Data Repositories Requirements, which, in part, require the data consumer to comply with access regulations and applicable licenses imposed both by law and by the data repository, and to conform to codes of conduct that are generally accepted in higher education and scientific research for the exchange and proper use of knowledge and information.

These data are distributed under the following terms of use, which are governed by ICPSR. By continuing past this point to the data retrieval process, you signify your agreement to comply with the requirements stated below:

## Privacy of RESEARCH SUBJECTS

Any intentional identification of a RESEARCH SUBJECT (whether an individual or an organization) or unauthorized disclosure of his or her confidential information violates the PROMISE OF CONFIDENTIALITY given to the providers of the information. Therefore, users of data agree:

- To use these datasets solely for research or statistical purposes and not for investigation of specific RESEARCH SUBJECTS, except when identification is authorized in writing by ICPSR (icpsr-help@umich.edu ✉)
- To make no use of the identity of any RESEARCH SUBJECT discovered inadvertently, and to advise ICPSR of any such discovery (icpsr-help@umich.edu ✉)

## Redistribution of Data

You agree not to redistribute data or other materials without the written agreement of ICPSR, unless:

1. You serve as the OFFICIAL or DESIGNATED REPRESENTATIVE at an ICPSR MEMBER INSTITUTION and are assisting AUTHORIZED USERS with obtaining data, or
2. You are collaborating with other AUTHORIZED USERS to analyze the data for research or instructional purposes.

When sharing data or other materials in these approved ways, you must include all accompanying files with the data, including terms of use. More information on [permission to redistribute data](#) can be found on the ICPSR Web site.

## Citing

You agree  
required to

citation in any publication that employs resources provided by ICPSR. Authors of publications based on ICPSR data are  
PSR for inclusion in

 The SSVD builds on a pilot project funded by the National Science Foundation. It demonstrates the benefits of variable-level documentation according to the [Data Documentation Initiative](#) standard.

**Search/Compare Variables**

The Social Science Variables Database (SSVD) enables ICPSR users to examine and compare variables and questions across studies or series. The SSVD currently contains over 5 million variables, representing about 76% of ICPSR's holdings that have quantitative data described in statistical syntax.

The SSVD does not include our entire collection. For a comprehensive search of all datasets, use our [main data search](#), which indexes all of the documentation available for our studies, including the variable descriptions.

## Is Love Really Blind?

[Printer Friendly version](#) [Collapse open tabs](#)

### Goal & Concept

#### Goal

The goal of this exercise is to explore some of the factors that influence the development of romantic relationships. Crosstabulations and comparison of means will be used.

#### Concept

Modern Westerners brought up on a steady diet of popular songs and romantic movies tend to believe that love is blind. However, research shows that love is both random and very subjective. Popular culture propagates the notion of "love at first sight" and "you can't help who you fall in love with."

Research shows, however, that this is not necessarily true and that, in reality, society aims to control who we fall in love with. Factors such as race, age, and religious backgrounds, education level, political views, and social status. This is known as homogamy.

In addition, scholars have shown that the pool of potential mates available to us is narrowed by routine activities, social networks, and familiarity, which all play an important role in the development of relationships. In other words, we tend to meet our partners in the context of our daily activities, through our social networks, and after coming into contact with them repeatedly (this is known as the mere exposure effect, or the idea that familiarity breeds liking).

In this exercise we explore the concepts of homogamy, routine activities, social networks, and mere exposure by examining how similar respondents are to their partners on a variety of social characteristics and how they met and became involved with their partners.

Examples of research questions about interpersonal attraction:

- What are the determinants of attraction or liking?
- How important is similarity in choosing a partner? Does it matter more for some qualities than others?
- How do changing social norms influence homogamy?
- How have technological changes affected interpersonal attraction and courtship?

ICPSR이 제공한 연구 주제의  
목적과 Research Question을  
확인할 수 있습니다.

## LEARNING CONTENT

## Dataset

This exercise will use data from the study [How Couples Meet and Stay Together](#) partners. It includes non-traditional couples. This study was conducted in three waves of data collection from 2005 to 2010. Respondents were asked about their relationship status, as well as the gender, ethnicity, and race of their current partners. They were also asked about their living arrangements with their partners; whether the couple attended the same high school, and/or college/university; or grew up in the same town. Information was collected on the legal status of the relationship (marriage, domestic partnership, or civil union), the city/state where the partnership was legalized, and how many times the respondent had been in a relationship of the same gender they were most attracted to. The study also collected information on when, and where they met their current partner. The first and third waves followed-up with respondents on their current relationship status, relationship status, living arrangements, household income, whether the respondent spent most of his or her time with their partner, and whether they were currently in a relationship.

## Variables

This exercise will use the following variables:

- Respondent's race (RESPONDENT\_RACE)
- Partner's race (PARTNER\_RACE)
- Does R have a spouse or partner? (QFLAG)
- How old is partner? (Q9)
- R's age--7 categories (PPAGECAT)
- What is your religion? (PAPRELIGION)
- What is partner's religion? (Q7B)
- R's education--highest degree received (PPEDUC)
- What is the highest level of schooling partner has completed? (Q10)
- Political party affiliation 3 categories (PPPARTYID3)
- Does [partner] think of him/herself as Republican, Democrat, independent, or another party? (Q12)
- Where did you meet your partner? (Q31\_1 through Q31\_8)
- Who introduced you to your partner? (Q33\_1 through Q33\_7)
- How long ago romance with partner began, in years (HOW\_LONG\_AGO\_FIRST\_ROMANTIC)
- How long ago respondent met partner, in years (HOW\_LONG\_AGO\_FIRST\_MET)

For ease of interpretation, recoding variables is sometimes necessary or helpful. (Note: the online analysis package used here requires recoding variables for the sole reason of modifying or adding labels.) The following variables were recoded:

- PPEUDC and Q10 measure respondents' and their partners' education respectively. Each variable contains 14 answer categories--too many for useful analysis. They were recoded into R\_EDUC and PARTNER\_EDUC by collapsing answers into 5 categories, ranging from "Less than HS" ("1"), to "Graduate/Professional degree" ("5").
